Advanced Trading Algorithms

Creating a Portfolio

Design your own trading
strategy – Culminating Project

04/29/2020

Kaushal Banthia

has successfully completed the online, non-credit Specialization

Trading Strategies in Emerging Markets

The purpose of this specialization is to equip individual investors and money managers with the skills required to develop their own trading strategies and test them. Most importantly, the specialization also provides the learner with eight ready-made trading strategies, which are highly successful in emerging markets. Most of these trading strategies are based on rigorous academic research. After completing this specialization, the learner will be able to design his own trading strategy, back test it and measure how well it has performed. He would also be able to build a portfolio of strategies.

A handwritten signature in black ink that reads "Thirumalai Ramabhadran".

Thirumalai,
Ramabhadran
Clinical Assistant
Professor
Indian School of
Business

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
